Coatings for Lighting

Exterior Lighting

Exterior Lighting

Interpon Powder Coatings offer a range of finishes and protective primer systems to enhance the aesthetic appeal and life expectancy of exterior lighting fixtures.

When an exterior lighting fixture is installed it is important that it has an attractive appearance but also that the appearance lasts for many years. Lighting fixtures remain in place through all seasons and face demanding changes in weather from the extreme frosts of winter to high UV light exposure in the summer. For steel substrates corrosion protection is enhanced by use of a 2-coat system using **Interpon APP120 primer** or **Interpon PZ zinc primer** with an Interpon exterior finish. **Interpon Powder Coatings** provide a range of coatings to satisfy these demanding requirements.

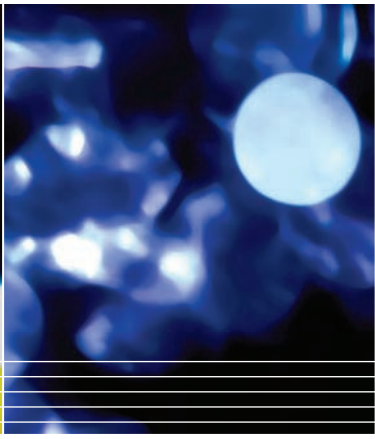

Our **Interpon D range** is one of them, designed for architecture and widely used for lighting.

Enhance your Product Range

Whether for personal security and safety to light up walkways at night, to enhance the appearance of a building or to add mood to a garden **Interpon Powder Coatings** offer a wide range of colors and finishes that can bring a distinct difference to your product range.

Technologies and Effects for Exterior and Interior Fixtures

Technology	Use
Easy Clean surfaces	Graffiti easily removed
High Abrasion resistance	Tough and resilient surfaces
Decor transfer	Wood effect, Marble finishes and more
UV durable metallic finishes	Suitable for extremely sunny exterior exposure
High Reflectance	A must for the best performance on white finishes
Special finishes	Ranges for interior and/or exterior end uses
High performance coatings	High flow, weatherability and chemical resistance
Anti-corrosion coatings	for better resistance to environmental degradation

Interior Lighting

Interior Lighting and Design

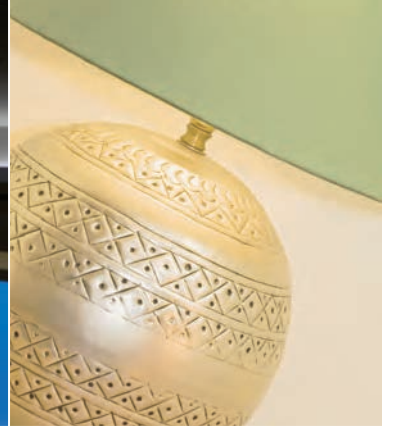

Lighting is extremely important to the interior design of a building or an individual room and its effects cannot be underestimated. The style and design of the fixture needs to be in harmony with its color and finish which could be a pearlescent effect, a metallic finish such as gold or bright silver or one of many exciting colored finishes from the **Interpon range**, fine or coarse textures or velvet and silky finishes that are pleasant to touch.

AkzoNobel Powder Coatings focuses on trends in color and finish to help designers to bring an extra dimension to the **Interpon powder coating ranges**.

Global Consistency

Wherever you are in the world we are able to supply product from stock or develop new and exciting finishes.

If you have product needs and specifications that cross international boundaries we can coordinate the manufacture and availability of those products locally ensuring quality and consistency of appearance across the world.

Recommended Products for a Range of Substrates

Substrates	Recommended range	
	Indoor	Outdoor
Steel	Interpon 310 Interpon 700	Interpon 610 Interpon D
Galvanised steel	-	Interpon 610 / anti-gassing Interpon D
Aluminium	Interpon 310 Interpon 700	Interpon 610 Interpon D
Glass	A range of finishes including tinted clears	

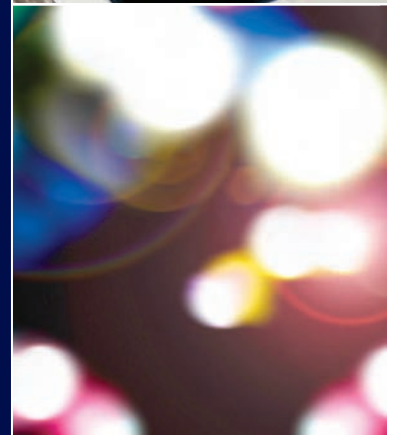

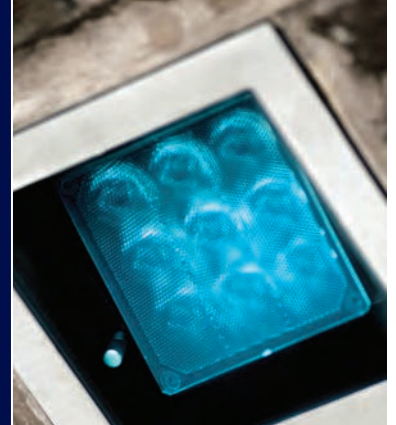

All products supplied & technical advice given are subject to the standard terms of sale of the AkzoNobel supplying company.
